### **ABSTRACT**

**T**eacher is supposed to be the ethical watchdog of the society. He is a role model for his students and also for the society. His secret of teaching values is to inspire and kindle the quest among the students by means of his own example of character and mastery of knowledge. It means by embodying values with ourselves 'we can really radiate values to our students. So good teacher should possess a sound psychological knowledge of the different parts of the being, of the different qualities that come into play in various actions and the right laws of the development of personality in relation to the development of capacities and values of an integrated personality. It requires specific training for teachers before entering the profession.

**KEYWORDS:** *Self-Discipline, School, Values, School, Students, Cultural Heritage.*
