ABSTRACT

Six Sigma is a methodology that marches excellence. There has been a noteworthy surge of the Six Sigma in manufacturing industry. The original grit of this model is to identify and eliminate causes of manufacturing flaws within large-scale industrial ventures. To accomplish advancement in the process of product creation and services including management philosophy of perfection, focusing on adapting to the demands of customers as well benefiting employees and owners. Companies applying Six Sigma concept tends to result in reduced cycle time and apt delivery to client.
