ABSTRACT

This paper is an attempt to answer questions related to lack of education in urban slums in India. It begins with an introduction and a brief summing up of Indian slum education and then makes an overview of the issues and factors that prevent the progress of education. It also tries to analyze the measures taken by the Government of India for the improvement of slum children's education. The alternative approaches and to create a space for discussion on the issues involved with education in the context of urban slums. Outcomes from this paper include a diverse collection of suggestions. This article helps in bringing forth the different problems of slum education that should be tackled. The paper concludes with a few suggestions that would cause the entire development and economic emancipation of the slum dwellers in India.

KEYWORDS: Deprived Children, Primary, Education, Slum, Poverty.
