ABSTRACT

In the recent past the Indian stock market has witnessed a significant growth in all the aspects. The history of the stock market in India dates back to 1875 where the Bombay Stock Exchange (BSE) came into being with name of Native Brokers Association. Since then, it has expanded its operations by leaps and bounds. This research paper studies the performance of Indian stock market in terms of number of stock exchanges, member players (brokers) and their classification, growth in investor population, performance of industrial securities, trend in foreign institutional investors etc.,.

JEL classification: G1, G2

KEYWORDS: Indian stock market, foreign institutional investors, stock brokers/members, stock exchange, the investor population.
