### **ABSTRACT**

***T****his study conducted on the topic of “A STUDY ON ISSUES AND PROBLEMS OF AGRICULTURE FARMERS IN KERALA”. In older days all the villages India were self sufficient by agriculture. But now we ignored the agriculture and accept other areas of livelihood. For knowing to retake our traditional livelihood, is there any new policies by the Government, is it effective, we select this topic to study the issues and problems of farmers and the policies of Government and its effectiveness in concerned area. The study is based on the data collected from the farmers in the 3 districts of kerala state . A sample of 500 is selected from them and asked about the various problems faced by them and also the governments attitude to wards agriculture. Data collected bare critically analysed using different tests.*
