POVERTY ERADICATION THROUGH MGNREGS IN DROUGHT-PRONE DISTRICT OF ANDHRAPRADESH –A STUDY

Dr. B. Venkatappa¹

ABSTRACT

*P*overty reduction has been an important goal of development policy since the inception of planning in India. Various antipoverty, employment generation and basic services programmes have been in operation for decades in India. The ongoing reforms attach greater importance to remove states of poverty, and addressing specifically the wide variations across status and the rural-urban. Anti-poverty strategy has three broad components: and targeted programmes of poverty alleviation to address multi-dimensional nature of poverty, the various programmes targeted at the poor have been streamlined and strengthened in recent years, including through the MGNREGS. The present paper highlights eradication of poverty and employment generation through MGNREGS in Anantapuramu district of Andhra Pradesh

KEY WORDS: Poverty, MGNREGS, Employment Generation
